Learning Objectives

- Define critical post-operative precautions per specific structures involved in surgery.
- Describe critical goals for each phase of recovery, describe indicators for care protocol progressions, and recognize indicators for delaying or scaling back protocol progressions.
- Recognize appropriate adjuncts to care (BFR, NMES, pool therapy) to minimize post-operative disability and enhance the recovery process.
- Implement appropriate post-operative functional and/or sports performance testing to establish objective criteria for return to activity/sport decision making and outcomes tracking.
